

Accurate slitting for a perfect cut

The ETF M 2422 slitting unit is a universal longitudinal cutter suitable for cutting various materials. It is based on a scissor-cut principle with 2 circular knives (\varnothing 132 mm) which ensures a perfect cut and a long lifespan.

The ETF M 2425 slitting knife is a universally applicable longitudinal cutter suitable for cutting various materials. It can be used as a hand knife or built onto a machine.

The knife consists of a driven blade with a fixed counter-blade, a built on grinding unit and a separate handle, and guarantees you a high quality slit.
