## Dutch efficiency in roll sorting...

ETF offers roll sorting systems in various versions. Whether you want to store cut-lengths or rugs in trolleys or racks, our sorting systems handle it very efficiently and are extremely flexible and user friendly. Decreasing labour costs and increasing safety are a direct result of applying a sorting system.

Connection of the ETF sorting system to your warehouse software ensures an insight into the position of rolls for a highly efficient way of loading trucks.

### Features & options

- Crane system to reduce impact when ejecting heavy rolls
- 360° barcode scanner to automatically determine roll destination from a label
