

# Sustainable roll end closing

The ETF ultrasonic sealing unit eliminates the need for clips or tape when closing your roll ends. Your PE, PP or other synthetic wrapping materials are sealed with great precision.

We offer a choice for either 50, 75 or 125 cm roll diameters, with a capacity of up to 6 end seals per minute.

## FEATURES & OPTIONS

- Robust construction
- Conveyor belts to forward rolls through the sealing unit
- Automatic roll diameter and length detection
